ARDEX X 77™ MICROTEC®
Fiber Reinforced Tile and Stone Mortar

The most advanced technology ideal for large format porcelain tile installations, exterior or interior, floor or wall

Use for setting porcelain, glass, quarry, ceramic and most natural stone tiles*

Advanced technology for very large and thin porcelain tiles

Extended open time of 60 minutes – double the ISO standard

Unmatched sag resistance – double the ISO standard

Outstanding coverage – 110 sq. ft. per bag (1/4” sq. notch trowel)

Medium bed applications (large and heavy tile mortar)

Water and frost resistant - ideal for swimming pools and high traffic areas

Unique creamy consistency, extremely easy to mix and apply

Highly flexible; 3-hour pot life

**Description and Usage**

ARDEX X 77™ MICROTEC® Fiber Reinforced Tile and Stone Mortar is a high-performance, microfiber-reinforced, polymer-modified mortar formulated especially for large format tile installations. Use to install porcelain, glass, quarry, ceramic and most natural stone tiles* over interior or exterior concrete and masonry floor and wall surfaces. Also use for interior applications over exterior-grade plywood. ARDEX X 77 is ideal for use in swimming pools and fountains and over in-floor heating systems and is recommended for all tile sizes, including mosaics.

Formulated to provide excellent bond strength, sag resistance and flexibility, ARDEX X 77 is ideal for the installation of large format tiles (interior and exterior), as well as high traffic areas, wet areas and exterior building façades.

**Substrate Preparation**

ARDEX X 77 adheres to both dry and damp substrates (no standing water) that are structurally sound, solid and free from oil, grease, wax, dirt, asphalt, curing compounds, sealers, releasing agents, gypsum patching compounds, dust, latex, paint and any contaminant that can act as a bond breaker. Plywood substrates must be dry, APA-rated, Type 1 exterior-grade plywood. Wallboards must be dry, sound and solidly anchored to structural components in the wall. The plane of wall surfaces must be plumb and true. Refer to ANSI A108.01 “General Requirements: Subsurface and Preparation by Other Trades” and the most current version of the Tile Council of North America’s “Handbook for Ceramic Tile Installation” for detailed information on surface preparation and guidelines for substrate construction. Floor surfaces must have minimal variation in the plane or slope as outlined by the Tile Council of North America.

Should pre-leveling or subfloor repair be required, use ARDEX AM 100™ Rapid Set Pre-Tile Smoothing and Ramping Mortar, ARDEX A 38™ Rapid Set Screed or ARDEX A 38™ MIX Rapid Set, Premixed Screed for exterior or interior use, or use ARDEX Liquid BackerBoard® Self-Leveling Underlayment for Interior Wood and Concrete Subfloors, ARDEX TL 1000™ Tile Leveler, Self-Leveling Underlayment or ARDEX TL PATCH® Tile Leveler, Underlayment Patch and Skimcoat for interior use, as appropriate. Observe the instructions and dry times in the ARDEX technical data sheets.

ARDEX X 77 will isolate dormant cracks up to 1/8” (3 mm) wide. Per ANSI A 108 AN-3.7, expansion joints must be provided over existing moving joints and moving cracks and where substrate materials change composition or direction.

**Priming / Treating the Substrate**

Highly absorbent substrates, such as plaster, existing tiles and certain non-porous substrates must be primed or treated as detailed below before proceeding with the tile installation.

**Highly Absorbent Substrates**

**Scratch Coat**
Apply a scratch coat of ARDEX X 77. Allow the scratch coat to cure 8 hours for wall tiles and/or 24 hours for floor tiles before proceeding with the tile installation.

**Prime (interior, dry applications only)**
Prime with ARDEX P 51™ Primer diluted 1:3 with water, and allow this course to dry thoroughly (min. 3 hours, max. 24 hours) before proceeding with the tile installation.

**Existing Tiles (Tile-over-Tile)**

**Scratch Coat**
Mechanically abrade the tiles to create a bonding profile. Apply a scratch coat of ARDEX X 77, and let the scratch coat cure 8 hours for wall tiles and 24 hours for floor tiles before proceeding with the new tile installation.

**ARDEX 8+9**
Apply a coat of ARDEX 8+9™ Rapid Waterproofing and Crack Isolation Compound, which must dry 1-2 hours before proceeding with the tile installation.

**ARDEX E 90 (interior, dry applications only)**
Mix ARDEX X 77 with ARDEX E 90™ Mortar Admix in accordance with the technical data sheet, and install directly over the existing non-porous surface.

**Metal, Glass and Certain Other Non-Porous Surfaces**

**ARDEX 8+9**
Apply a coat of ARDEX 8+9™ Rapid Waterproofing and Crack Isolation Compound, which must dry 1-2 hours before proceeding with the tile installation.

**ARDEX E 90 (interior, dry applications only)**
Mix ARDEX X 77 with ARDEX E 90™ Mortar Admix in accordance with the technical data sheet, and install directly over the existing non-porous surface.

For more information, refer to the ARDEX Substrate Preparation Brochure at www.ardexamericas.com.

**Recommended Tools**

Margin trowel, mixing container, ARDEX T-2 Ring Mixing Paddle, 1/2” (12 mm) heavy-duty drill (min. 650 rpm) and appropriate notched trowel.
Notes

FOR PROFESSIONAL USE ONLY.

When setting certain types of tile or stone, it may be necessary to trowel a layer of mortar on the back of each tile or stone prior to placement on the combed mortar bed in order to achieve the required mortar-to-tile contact. Press each tile firmly into the freshly combed mortar to ensure maximum mortar contact with the tiles.

For cases requiring waterproofing, please refer to the ARDEX 8+9 technical data sheet and the ARDEX 8+9 5 Step Application Guide.

*For setting moisture-sensitive natural stone or agglomerate tiles, use ARDEX X 32™ MICROTEC® Fiber Reinforced Rapid Setting Thin to Thick Bed Mortar or ARDEX N 23 MICROTEC® Rapid Set Natural Stone and Tile Mortar (interior, dry applications only). For setting glass tiles in swimming pools and other submerged areas, use ARDEX WA. For setting glass tiles at the water line of a swimming pool, use either ARDEX WA or ARDEX X 77 White mixed with ARDEX E 90. Always comply with local building codes. Please contact the ARDEX Technical Service Department before proceeding with any of the above demanding applications.

ARDEX X 77 is intended for use at material and surface temperatures between 50° and 85° F (10° to 29° C). Do not install below 50°F (10°C) surface and air temperatures. For warm weather installation instructions, please contact the ARDEX Technical Service Department.

Never mix with cement or additives other than ARDEX-approved products. Observe the basic rules of tile work. ARDEX recommends the installation of test areas to confirm the suitability of the product for its intended use. Dispose of packaging and residue in accordance with federal, state and local waste disposal regulations. Do not flush material down drains.

Precautions

Carefully read and follow all precautions and warnings on the product label. For complete safety information, please refer to the Safety Data Sheet (SDS) available at www.ardexamericas.com.
## Technical Data According to ARDEX Quality Standards

All data based on a mixing ratio of 2 parts powder to 1 part water by volume at 70°F (21°C). Physical properties are typical values and not specifications.

### Mixing Ratio:
8 1/4 - 8 3/4 quarts (7.8 - 8.2 L) of water per 40 lb. (18 kg) bag. For smaller batches, use 2 parts powder to 1 part water by volume.

### Coverage (approx.):
- 1/4" x 1/4" x 1/4"
  - Sq. Notch Trowel: 110 sq. ft. (10.2 sq. m)
  - 1/4" x 3/8" x 1/4"
  - Sq. Notch Trowel: 82.5 sq. ft. (7.6 sq. m)
  - 1/2" x 1/2" x 1/2"
  - Sq. Notch Trowel: 55 sq. ft. (5.1 sq. m)

### Open time:
Up to 60 minutes

### Pot Life:
Approx. 3 hours

### Adjustments Time:
Approx. 20 - 30 minutes

### Time to Grout:
- Walls: 8 hours
- Floors: 24 hours

### Color:
- Gray
- White

### Packaging:
40 lb. (18 kg) bag

### Storage:
Store in a cool dry area. Do not leave bags exposed to sun.

### Shelf Life:
1 year, if unopened

### Warranty:
ARDEX Americas Standard Limited Warranty applies. Also eligible for the ARDEX SystemOne™ Warranty when used in conjunction with ARDEX grouts and ARDEX caulks.
