ARDEX GUIDE SPECIFICATION
ARDEX K 521™ Self-Leveling Concrete Topping with Aggregate Surface

SECTION 03 01 30
MAINTENANCE OF CAST-IN-PLACE CONCRETE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings, general provisions of the Contract, and other related construction documents such as Division 01 specifications apply to this Section

1.2 SUMMARY

A. This Section includes a single-coat, fast-curing, 100% solids epoxy moisture management system formulated to suppress excessive moisture vapor emissions in new or existing concrete prior to the installation of an ARDEX polished concrete topping finished to a specified finish using traditional dry concrete polishing techniques. Application of joint filler for both moving and non-moving cracks and joints. Application of a densifier, stain protector/guard and/or sealer to inhibit absorption of liquid into the surface, thereby minimizing the potential for discoloration due to staining. Application of topical and/or integral color. Furnish all labor, materials, equipment and services necessary for the dry diamond grinding and polishing of the self-leveling floor in accordance with industry standards.

1. ARDEX ARDIFIX™ Two-Part, Low Viscosity Rigid Polyurethane Crack & Joint Repair
2. ARDEX ARDISEAL™ RAPID PLUS Semi-Rigid Joint Sealant
3. ARDEX MC™ Rapid One-Coat Moisture Control System for Concrete to Receive ARDEX Products - For Use as a Fast-Track Primer
4. ARDEX K 521™ Self-Leveling Concrete Topping with Aggregate Surface
5. ARDEX PC 60 Polyurethane Sealer for Stain & Wear Protection
6. Mechanical Diamond Grinding and Polishing Equipment
7. Integral and Topical color

B. Related Sections include the following:

1. Section 03 30 00, Cast-In-Place Concrete
2. Section 09 05 61.13, Moisture Vapor Emission Control
1.3 REFERENCES

A. ASTM C109M, Compressive Strength Air-Cure Only
B. ASTM C348, Flexural Strength of Hydraulic-Cement Mortar
C. ASTM F2170, Relative Humidity in Concrete Floor Slabs Using in situ Probes
D. ASTM F710 - Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring

1.4 SUBMITTALS

A. Product Data: Submit manufacturer’s product data and installation instructions for each material and product used. Include manufacturer’s Safety Data Sheets.
B. Qualification Data: Provide written documentation from the manufacturer confirming that installer meets the qualifications as specified and is eligible for manufacturer’s warranty. Provide project names, address, contact names, phone numbers of at least three projects of similar scope completed by the installer
C. Maintenance Data: Provide instructions for maintenance of installed work, including methods and frequency recommended for maintaining optimum condition under intended use. These instructions should contain precautions against cleaning products and methods that may be detrimental to finishes and performance.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: Installer should be experienced in performing specified work similar in design, products and scope of this project, with a documented track record of successful, in-service performance and with sufficient production capabilities, facilities and personnel to produce specified work.
B. Mock-Up: Before performing the work in this section, an on-site mock-up of the representative product and specified process, surface, finish, color and joint design/treatments must be installed for review and approval. These mock-ups should be installed using the same Installer personnel who will perform work. Approved mock-ups may become part of completed work, if undisturbed at time of substantial completion. Mock-up must also include specified edge finish and approved by the Architect/owner’s representative.
C. Pre-Installation Conference:
   1. Prior to the installation of the ARDEX K 521™ an on-site conference shall be conducted to review specification requirements.
2. The minimum agenda shall include a review of the site conditions, construction documents, schedule, installation procedures, protection procedures and submittals.

D. Warranty:

1. ARDEX MC RAPID: Certified applicator must file a pre-installation checklist with the manufacturer and receive written confirmation of the approval to proceed in order to obtain the extended ARDEX MCT™ RAPID Warranty. Upon receipt and approval of the pre-installation checklist, a 25-year ARDEX MCT™ RAPID Warranty is available for ARDEX LevelMaster Elite® Installers and a 20-year ARDEX MCT™ RAPID Warranty is available for factory-trained installers.

1.6 DELIVERY, STORAGE AND HANDLING

A. Deliver all materials in original containers, bearing manufacturer’s labels indicating brand name and directions for storage, factory numbered and sealed until ready for installation.

B. Store all materials in a dry, climate-controlled environment at a minimum of 50°F (10°C) and maximum of 85°F (29°C).

C. Handle products in accordance with manufacturer’s printed recommendations.

1.7 SITE CONDITIONS

A. Observe the basic rules of concrete work. Do not install below 50°F (10°C) or above 85°F (29°C) surface temperature. Install quickly if floor is warm (above 70°F/21°C and up to 85°F/29°C) and follow warm weather precautions available from the ARDEX Technical Service Department (888) 512-7339. Never mix with cement or additives other than ARDEX approved products.

B. Inspect the existing substrate and document unsatisfactory conditions in writing. Verify that surfaces and site conditions are ready to receive work. Correct unacceptable conditions prior to installation of System. Commencement of work constitutes acceptance of substrate conditions.

C. Close areas to traffic during and after the ARDEX Topping installation.

PART 2 – PRODUCTS

2.1 MOISTURE VAPOR EMISSION CONTROL

A. One-Coat Moisture Control System for Concrete to Receive ARDEX Underlayments and Toppings

1. Acceptable Products:

ARDEX MCT™ RAPID; Manufactured by ARDEX Americas: 400 Ardex Park Drive, Aliquippa, PA, 15001, USA, (724) 203-5000, www.ardexamericas.com
2. Performance and Physical Properties: Meet or exceed the following values for material cured at 70°F +/-3°F (21°C +/-3°C) and 50% +/-5% relative humidity:

   b. Material Requirements on CSP 3 Prepared Concrete: Approx. 250 - 270 sq. ft. (25 m²) per mixed unit for 10 mils, and approx. 170 – 190 sq. ft. (16 – 18 m²) per unit for 14 mils
   c. Permeability (ASTM E96): 0.06 perms
   d. 14 pH solution (ASTM D1308): No effect
   e. Working Time: 20 minutes
   f. Pot Life: 20 minutes
   g. VOC: 19.9 g/L, A+B, ASTM D2369 Walkable: Minimum of 4 hours
   h. Prime and Install Underlayment: Minimum 4 hours, maximum 24 hours

2.2 MAINTENANCE OF CAST-IN-PLACE CONCRETE

A. Portland Cement-Based Self-Leveling Topping are suitable to receive a mechanical polish concrete process. Acceptable products include:

   1. ARDEX K 521™ Polished Concrete Topping; ARDEX Engineered Cements: 400 ARDEX Park Drive Aliquippa, PA 15001, 1-888-512-7339, www.ardexamericas.com

      a. Water: Shall be clean, potable and sufficiently cool (not warmer than 70°F/21°C)

2. Performance and Physical Properties:

   i. Meet or exceed the following values for material cured at 70°F (20°C) and 50% relative humidity:

      i. Flow Time: 10 minutes
      ii. Compressive Strength: 6,800 psi (476 kg/cm²) at 28 days, ASTM C109M
      iii. Flexural Strength: 1,300 psi (91 kg/cm²) at 28 days, ASTM C348
      iv. VOC: 0

B. Topical Color

   1. As selected by Architect

C. Integral color

   1. As selected by Architect. Powder or liquid pigments can be utilized for integral pigmentation. The pigments must be suitable for use with a cementitious product.

2.3 CONCRETE POLISH EQUIPMENT & TOOLING

A. Equipment and Tooling for use as part of the multi-step dry mechanical process and accessories. Acceptable products include:
1. Planetary Grinder and Polisher
   b. Tooling
      i. Metal Bonded Diamonds 100/150 Grit bonded metal
      ii. Transitional Diamonds Ceramic / Flat block resin Bonded
      iii. Resin Bonded Diamonds - 200, 400, 800, 1500 Grit, as needed

2. Micro Polisher – Burnisher
   a. Specific weight and RPM are required to reach temperature of 100°F for application of floor finish/guard
   b. Required Tooling: Diamond Impregnated Pads – 400, 800, 1500, 3000 Grit

3. Other equipment and tooling as necessary for small areas and edge work.

4. Power generator – as needed

5. All grinding and polishing completed with grinder/polisher equipment should be connected to a dust collector.

2.4 CONCRETE TREATMENT CHEMICALS
   A. Concrete treatments designed for use in conjunction with the installation of the ARDEX Polished Concrete Topping.

2.5 SEALER
   A. A film-forming sealer that provides increased abrasion and stain resistance. Acceptable products include:
      1. ARDEX PC 60; ARDEX Engineered Cements: 400 ARDEX Park Drive Aliquippa, PA 15001, 1-888-512-7339, www.ardexamericas.com

PART 3 - EXECUTION

3.1 EXAMINATION
   A. Examine substrates and conditions under which materials will be installed. Do not proceed with installation until unsatisfactory conditions are corrected.
   B. Verify that existing concrete has cured a minimum of 28 days before installing ARDEX Concrete Toppings and meets the strength requirement of a minimum compressive strength of 3000 psi, a minimum density of 100 pcf and a minimum tensile strength of 200 psi.
   C. Conduct pre-installation conference, per Section 1.5 C.

3.2 PREPARATION
A. All concrete subfloors must be sound, solid, clean, and free of all oil, grease, dirt, curing compounds and any substance that might act as a bond breaker before priming. Mechanically clean if necessary. Acid etching and the use of sweeping compounds and solvents are not acceptable.

B. Concrete shall be mechanically prepared to achieve a minimum concrete surface profile (CSP) in accordance with ICRI standards.

C. Prior to beginning the installation, the relative humidity within the concrete can be measured (ASTM F2170). No standing water shall be present.

3.3 Crack and Joint Treatment

A. Joint Preparation: Honor all joints, including expansion joints, isolation joints and control joints (saw cuts), up through the ARDEX Topping.

1. All dormant cracks shall be filled, such as ARDEX ARDIFIX™ Low Viscosity Rigid Polyurethane Crack & Joint Repair.

3.5 APPLICATION OF ARDEX MC™ RAPID:

A. Coordinate installation with adjacent work to ensure proper sequence of construction. Protect adjacent areas from contact due to mixing and handling of materials.

B. Mixing: Comply with manufacturer's printed instructions and the following.

1. Each individual 22 lb. (10 kg) unit contains separate, pre-measured quantities of hardener (Part B) and the resin (Part A). After opening each container, stir the individual components thoroughly before blending. The hardening agent (Part B) is added to the resin (Part A).

2. Pour all of the hardener into the resin portion and stir thoroughly for a minimum of 3 minutes using a low speed drill and an epoxy mixing paddle. Once mixed, pour some of the epoxy back into the hardener container, stir for 10 seconds, and then pour all of the contents back into the resin container. Mix for an additional 30 seconds before applying.

A. Application: Comply with manufacturer's printed instructions and the following.

1. Apply the freshly mixed ARDEX MC™ RAPID at a minimum thickness of 14 mils as specified in the technical data sheet to the prepared concrete surface in a uniform direction with a short-nap paint roller or notched squeegee with back-rolling for smoother surfaces, and a longer nap roller for more uneven substrates. Sand broadcast to refusal while the ARDEX MC RAPID is still in a fresh state.

2. Following the application of MC RAPID and sand broadcast, install the selected ARDEX Topping as outlined in the technical data sheet.

3. It is not necessary to re-test the substrate for moisture emissions prior to installing the coating or floor covering.
3.6 APPLICATION OF ARDEX K 521™

A. PRIMING

1. No additional priming is needed. The sand-broadcast surface of the ARDEX MC RAPID serves as the primer prior to the ARDEX Topping application.

B. MIX DESIGNS

1. Mixing Ratio: The ARDEX Topping shall be mixed in 2-bag batches. Mix each bag of the powder with the specified amount of water in an ARDEX T-10 Mixing Drum using an ARDEX T-1 Mixing Paddle and a 1/2” heavy-duty drill (12 mm, min. 650 rpm). Mix thoroughly for 2-3 minutes to obtain a lump-free mixture. Follow written instructions on the ARDEX product bag label.

C. ARDEX K 521™ INSTALLATION

1. The minimum installation thickness for ARDEX Topping shall be 3/8” (9 mm). The necessary thickness will vary with jobsite conditions, and must be adequate to achieve the desired finish.

2. Pour or pump the liquid topping and spread in place with the ARDEX T-4 Spreader. Use the ARDEX T-5 Smoother for installation. Contact ARDEX Technical Services if a spike roller is to be used. Wear baseball shoes with non-metallic cleats to avoid leaving marks in the liquid topping. The topping can be walked on in 2-3 hours at 70°F (21°C).

2. Allow the ARDEX Topping to cure a minimum of 24 hours before proceeding with the polishing process. Drying time is a function of jobsite temperature and humidity conditions, as well as the installation thickness.

3.7 POLISHING PROCESS FOR ARDEX TOPPING

A. Processing of the ARDEX Polished Concrete Topping includes concrete preparation, joint treatment and chemicals to achieve the intended result.

1. PROCESSING

a. GRIND/POLISH #1: 100 - 150 Grit Metal Bonded Diamonds. Vacuum floor after each grinding/polishing step to remove dust.

b. GRIND/POLISH #2: #100 Grit Transitional, Ceramic / Flat block resin bonded diamonds. Vacuum floor after each grinding/polishing step to remove dust.

c. GRIND/HONING #3: 200 grit Resin Bonded Diamond. Vacuum floor after each grinding/polishing step to remove dust.

d. Apply densifier, allow to dry per Manufacturer’s Instructions before beginning the next step.
e. **GRIND/POLISHING #4**: 400 grit Resin Bonded Diamond. Vacuum floor after each grinding/polishing step to remove dust.

f. **GRIND/POLISHING #4**: 400 or 800 grit Resin Bonded Diamond. Vacuum floor after each grinding/polishing step to remove dust. Use 800 grit when higher gloss level is desired. Proceed with successively higher grits until gloss level desired.

g. Apply finish/guard per manufacturer’s instructions.

h. **MICROPOLISH/BURNISH** Use 800 – 1500 grit pad. Dry, micro fiber mop the floor clean to remove all debris. Floor should be allowed to cool to room temperature prior to second application.

i. Apply finish/guard per application instructions.

j. **MICROPOLISH/BURNISH** Use 1500-3000 grit pad. Dry mop the floor clean to remove all debris.

2. **EDGECWORK** - Polished edge work of ARDEX Topping shall be done with a hand held or walk behind polishing tool. The edge polishing process will match the corresponding steps outlined above for the desired gloss level.

B. **SEALER APPLICATION**

1. Seal installation with ARDEX PC 60 in accordance with the technical data sheet.

C. **POST INSTALLATION**

1. All moving cracks and all joints and saw cuts shall be filled with a flexible sealing compound specifically designed for use in moving joints, such as ARDEX ARDISEAL RAPID PLUS.

3.8 **PROTECTION**

A. Protect the new ARDEX Topping from spills and contamination by petroleum, oil, hydraulic fluid, acid and acidic detergents, paint and other liquid dripping from trades and equipment working over these substrates. If construction equipment must be used on these substrates, diaper all components that may drip fluids. Protect surface by installing a protective floor covering.

B. **Avoid moisture for 72 hours after installation.** Don’t permit standing water for this period or place any protective plastic sheeting, rubber matting, rugs or furniture that can prevent proper drying, thereby trapping moisture, which can result in a cloudy effect on the floor.

3.9 **MAINTENANCE**

A. **IMPORTANT NOTICE**: Maintaining the ARDEX Polished Concrete Topping and adherence to a recommended cleaning schedule will help the floor hold its mechanically polished gloss longer and greatly reduce the absorption of spilled liquids. The treated concrete floor is easily maintained by regular cleaning with the Maintenance/Post Cleaning procedure, accompanied by Micro Polishing. Specific maintenance recommendations shall be provided by the installer performing the work of this section. Contact the Manufacturer of selected chemicals or ARDEX Technical Services Department for recommendations.
END OF SECTION
